ORDINANCE NO. 868

AN ORDINANCE of the City of Kent, Washington, providing for the construction and installation of certain additions and improvements to the sanitary sewage disposal system of the city, declaring the estimated cost thereof, and providing for the issuance of sewer revenue bonds in the total principal sum of not to exceed $325,000 to pay part of the same.

WHEREAS, The City of Kent now owns, operates and maintains a system of sanitary sewage disposal which does not have a sewage treatment plant, and the public health, welfare and safety is being endangered by the lack thereof, which danger may be abated by the construction and installation of such a plant; and

WHEREAS, the city has approximately $22,000 in its "Washington State Development Sewage Treatment Plant Fund" available to pay part of the cost of acquiring, constructing and installing said treatment plant, and it is deemed necessary and advisable that it authorize the issuance of its sewer revenue bonds in the total principal sum of not to exceed $325,000 to pay the balance of such cost;

NOW, THEREFORE, BE IT ORDAINED by the Council of the City of Kent, Washington, as follows:

Section 1. The following described plan of additions and improvements to the sanitary sewage disposal system of the city is hereby proposed, specified and adopted, to wit:

The city shall acquire, construct and install a primary treatment plant on a portion of Section 23, Township 22 North, Range 4 E. W. M., listed on the King County Assessor's tax rolls as "Tax Lot 48", and now owned by the city. Such treatment plant shall be comprised essentially of the following units: A pumping station; a main building housing primary clarifiers, office, boiler room,
chlorinator room, and other appurtenant facilities; a digester contiguous to such main building; a biological filter and sludge drying beds; and shall be constructed and installed with all necessary piping, electrical controls and accessories, and shall be connected to the existing sewage system of the city.

Said plan of acquiring, constructing and equipping said treatment plant is all as more particularly described and set forth in plans and specifications therefor prepared by Carey & Kramer, consulting engineers of Seattle, Washington, and may be subject to such additions or changes as to details or other changes not affecting the main general plan as hereinbefore set forth as may be authorized by the City Council either prior to or during the actual course of construction.

Section 2. The estimated cost of the acquisition, construction and installation of the above described plan of additions and improvements to the sanitary sewage disposal system of the city is hereby declared to be, as near as may be, the sum of $347,000, approximately $22,000 of which shall be paid out of the moneys in the Washington State Development Sewage Treatment Plant Fund of the city and the balance of which shall be paid from the sale of the sewer revenue bonds of the city hereinafter provided for.

Section 3. The city does hereby propose and adopt as an integral part of the plan for the acquisition, construction and installation of said additions and improvements to its sanitary sewage disposal system that it shall issue and sell its sewer revenue bonds in the principal sum of not to exceed $325,000. The exact date, form, terms and maturities of said bonds shall be as hereafter fixed by ordinance.

Section 4. This ordinance shall become effective five days
from and after its passage, approval and publication as required by law.

PASSED by the Council of the City of Kent, Washington, and approved by its Mayor at a regular meeting of said Council held this 7th day of December, 1953.
